

COLD WEATHER ADVISORY

Be aware that pets should be inside during inclement weather/freezing temps. Any animals left outside for periods of time without access to adequate shelter may be subject to seizure where conditions allow.

If you need crates or kennels to bring your pets inside, please contact us.

We have donated crates we can hand out while supplies last.

Outdoor animals such as livestock, barn cats, chickens etc... should have access to shelter and plenty of food and water that is not frozen solid.

Keeping their bellies full will help them stay warm. Deep, dry straw in their shelter will help to keep them warm as well.

If you have concerns about an animal left out in freezing weather, please call 254-953-5472 during business hours, and 254-953-5400 after hours.

As a reminder, if you have a wildlife or TNR trap, please ensure it is closed and put away during cold weather. These are not conditions conducive to trapping, so please wait until we have warmer temps to trap.

If you are unable to bring your pet inside for any reason and need help sheltering it during this storm, please contact us.
